

Clay County Quality of Life

Progress Report | Second Edition, 2015

A guide for building a better community.

ST. VINCENT'S
H E A L T H C A R E

Title Sponsor

Blain Claypool, President of Acute Care

St. Vincent's HealthCare is proud to be the title sponsor of the *Clay County Quality of Life Progress Report, Second Edition, 2015*. We are committed to the health and well-being of this great community and are proud to be one of your neighbors.

When our Clay County hospital opened two years ago, we created hundreds of jobs and more are coming as we work to expand our offerings and our facility in 2016. Our goal all along has been to serve you and your family in your own backyard—making it more convenient to receive St. Vincent's

signature high-quality, compassionate care. Most notably, this time next year--- families in Clay County will be able to say their babies were born at St. Vincent's Clay County!

St. Vincent's believes in Clay and is investing in the community beyond our new hospital. Just recently, we announced a partnership with the Clay County School Board, Southeast Orthopedic Specialists and Preferred Physical Therapy to provide a new comprehensive sports medicine program to the county's public middle and high schools. The goal is to prevent injuries and the services are being offered at no cost to the school system. The program offers:

- A certified athletic trainer in each high school and one certified athletic trainer for every two middle schools
- Educational sessions for school officials and students on sports-related topics
- \$1,000 in medical supplies for each middle and high school

As the former President of St. Vincent's Clay County, I will forever be grateful for your support of our health system. I too, am a proud Clay County resident and am personally grateful for the hospitality the residents here have shown my own family.

St. Vincent's looks forward to continuing to serve the needs of our neighbors in Clay County for years to come.

Sincerely,
Blain Claypool
President of Acute Care
St. Vincent's HealthCare

Introduction

Welcome to the *Clay County Quality of Life Progress Report, Second Edition, 2015*. When the inaugural *Clay County Quality of Life Progress Report* was published in 2008, it was the first document of its kind to offer the community a baseline set of data to measure the state of Clay County and provide a means to begin monitoring progress towards achieving a shared vision for Clay County's future. Volunteers from across the county participated in surveys and volunteered as committee members to help reach a consensus on a shared vision for Clay County. The result, a community effort of thousands of citizens, is this guide. Collectively, the inaugural report and its future updates establish trend lines for building a better community.

After the inaugural report was published in 2008, the economy experienced a recession, affecting many aspects of the community. The unemployment rate climbed, home values declined, and the need for social services increased. Yet, despite the economic downturn, the community remained positive about the quality of life in Clay County. In the public opinion survey conducted for this 2015 edition, 90 percent of residents surveyed said they were satisfied with the quality of life in Clay County.

This guide provides a roadmap for the community to help us determine where we have been, where we are, and critical issues that face our community. While the inaugural report helped us to set a baseline, this update begins to show us trends in the community. Most indicators from the inaugural report were included in this edition. Others were replaced with more current and telling indicators.

The data in this edition is obtained from various resources including but not limited to government and public records, private businesses, nonprofit organizations, and local churches. We have attempted to include the most current data available at the time of preparation of this edition. This edition is also available online at www.claychamber.com.

Are you a decision maker, business owner, parent, community volunteer, or concerned citizen? We invite you to use this guide to help evaluate the state of the community and plan for the future. This guide can be used to generate conversations and encourage community involvement to both celebrate and improve the quality of life in Clay County.

Indicator Selection Criteria

The Quality of Life indicators have been selected based on the following criteria:

Purpose

The indicator is both meaningful (it provides information valuable for community members to understand important aspects of their quality of life) and useful (it offers a sense of direction for additional research, planning, and action toward positive community changes and a means of assessing progress toward these desired changes).

Importance

The indicator measures an aspect of the quality of life which a diverse group of people in the community would agree is important in relation to the priorities in the community's shared vision or goals.

Validity and Accuracy

If the indicator trend line moves upward or downward, a diverse group of people in the community would agree on whether the quality of life is improving or declining.

Relevance

The indicator measures an aspect of the community's quality of life that the community can improve through public decision making and action at the community level.

Responsiveness

The indicator trend line responds relatively quickly and noticeably to real changes in the quality of life.

Anticipation

The indicator anticipates future trends rather than reacting to past trends. A "leading" indicator is generally more useful than a "lagging" indicator because it allows a proactive response.

Understandability

The indicator measures an aspect of the community's quality of life in a way that most citizens can easily understand and interpret in relation to their own lives.

Availability and Timeliness

Data for the indicator are readily available and affordably accessible on an annual basis from a credible public or private source.

Stability and Reliability

Data for the indicator are collected, compiled, and calculated in the same way each year.

Asset Orientation

Where possible, the indicator measures a positive aspect of the community's quality of life (to focus on community assets) and a trend line increase clearly denotes an improvement in the quality of life.

Scale

The indicator is reported for a geographic area that is most meaningful for community understanding and most helpful for improvement. For many indicators, trend lines for counties surrounding Clay County are also reported and where appropriate statewide numbers are reported.

Clarity

The indicator uses measures that filter out extraneous factors. Per-person rates filter out the effect of population growth, and constant dollars eliminate the effect of inflation. Raw numbers are used where magnitudes are important.

Representativeness

Taken together, the indicators measure the major dimensions of the community's quality of life.

Executive Summary

Clay County continues to grow in size and opportunities while maintaining its family friendly environment and close knit community feel. This edition captures the positive trends in the community as well as areas that need improvement. The indicators do not explain why a trend is moving one way or the other or what should be done to address a trend. That is up to the community to decide. The indicators do provide data and background for the ten key elements that Clay residents think are important for the quality of life in Clay County.

From 2000 to 2014, Clay County's population grew by 42 percent, or nearly 59,000 residents. A growing population means more services are needed from businesses, government, and nonprofit organizations. It also reflects that healthy communities tend to attract new residents. The following pages show that the dedicated citizens of Clay County are committing time, resources, and compassion to help provide diverse opportunities and build a strong community.

Arts and Culture

The vision is that arts and culture activities are valued and supported. How are we doing? Attendance at local arts venues and cultural events continues to grow. The Clay County Fair continues to be a Blue Ribbon Fair, a state award it has received every year since 2003. In addition, new arts events have been instituted since the inaugural report. The addition of the visual arts galleries to the Thrasher Horne Center and the establishment of the CalaVida Arts Festival are two examples. However, the number of elementary students per art teacher remains high and the majority of elementary schools in Clay County have no paid art teacher. Volunteers from the Art Enrichment Program of Clay County continue to try and fill the gap by sharing art in the classrooms.

Economy

The vision is for the economy to support a diverse employment base and affordable housing. How are we doing? Like most of the nation, Clay County is continuing to recover from tough economic challenges. The national, state, and county unemployment rates continued to rise through 2010 but have since dropped to nearly half those rates. Job growth in Clay County remains slow and the average annual wage for jobs within Clay County remains lower than in some surrounding counties and the statewide average. Over the last three years, both the median price and number of homes sold in Clay County have increased but are still lower than in 2007. The total value of taxable property in 2014 was only 15 percent higher than in 2005.

Education

The education vision is to encourage, reward, and set expectations for lifelong learning. How are we doing? Clay County is rich in quality educational opportunities. FCAT 2.0 Reading scores of fourth grade students in Clay County remain consistently higher than the statewide percentage. Graduation rates continue to rise and over 80 percent of Clay County's public school seniors graduated from high school on time in 2014. We have also seen a developing trend indicating that more students are prepared for higher education. Since 2005, the number of students taking the ACT has doubled and the average scores for the county remain above the statewide averages. The number of students taking Advanced Placement exams and participating in dual enrollment (some college courses while attending high school) have also increased.

Environment

The vision is for a protected environment and citizens who participate in sustainable activities. How are we doing? Residential per capita water usage in Clay County has decreased indicating a growing awareness for water conservation. Per capita solid waste generated has increased modestly from 1,740 pounds in 2008 to 1,820 pounds in 2014. Recycling represents an annual average amount of 23 percent of the county's solid waste. Water quality is improving with reduction goals for phosphorous and nitrogen in waterways reaching 95 percent and 94 percent completion, respectively. This has a positive impact on the water ecosystem and the natural populations of flora and fauna.

Governance

The vision is that government is responsive to the needs of the community. How are we doing? In 2014, 90 percent of Clay County adults (18 and over) were registered to vote as compared to the statewide rate of 60 percent. Voter turnout continues to be consistently higher in presidential election years than in statewide elections. A little more than one-third (37%) of residents surveyed in 2015 rated the quality of leadership of local county government as "good" and four percent rated it as "excellent." The respondents were somewhat less positive in their assessment of county leadership in 2015 than in 2008.

Health

The vision is for all Clay County residents to have access to comprehensive, affordable, and quality healthcare. How are we doing? Access to healthcare has significantly improved. Since the 2008 report, two new major healthcare facilities were built in Clay County--Baptist Clay Medical Campus in Fleming Island and St. Vincent's Medical Center Clay County in Middleburg. Orange Park Medical Center also underwent major expansions. The number of residents receiving Medicaid (13.6 %) has nearly doubled since 2008 (7.6%). Residents receiving Medicare represent 15 percent of Clay County's population. Heart disease and cancer continue to be the primary causes of death in the county. In Florida's 2015 County Health Rankings Report, Clay County ranked 11th as the healthiest county in the state.

Public Safety

The public safety vision is reflected by residents feeling safe in their homes and in the community. How are we doing? Since the inaugural report in 2008, the total index crime rate in Clay County has decreased. Non-violent theft (larceny) accounts for the largest number of crimes. Domestic violence related crime rates in Clay County have decreased modestly over a ten-year period. Clay County's clearance rate or percentage of crimes cleared remains significantly better than the state's rate. Clay County's five-year average annual clearance rate is 43 percent while the statewide five-year average annual clearance rate is only 25 percent. Most Clay County residents (77 percent) feel safe walking alone at night in their neighborhood. On the roads, Clay County motor vehicle accidents have increased slightly but the number of fatalities have decreased.

Recreation

The recreation vision is for abundant opportunities both indoors and outdoors. How are we doing? Total park acreage increased between 2010 and 2015 creating more access to outdoor recreational activities. The number of public fishing piers in Clay County has grown from six piers in 2003 to 11 piers in 2014, providing more waterway access points for non-boaters. In 2014, Clay County offered 33 baseball fields, 13 basketball courts, 9 football/multi-purpose fields, 31 soccer fields, 26 tennis courts, and 11 softball fields for public use. These numbers do not include the many other private recreation areas. Participation in organized sports through the YMCA, Police Activities League (PAL), and the Clay County Parks and Recreation Division continue to be well attended.

Social Well-Being

The vision for social well-being is defined by all residents helping to create a compassionate community whereby everyone has an opportunity to live a satisfying life with their basic needs met. How are we doing? The increase in the number of residents needing food stamps and other assistance has risen sharply over a ten-year period. In 2014, Clay County had more than 26,000 food stamp clients compared to only 7,800 in 2005. Local church outreach programs and nonprofit organizations have increased services to help affected residents meet their basic needs. Community support and collaboration are vital. The number of Clay County public school students with disabilities is also increasing steadily, as is the number of children in foster care.

Transportation

The vision is that transportation systems are safe, efficient, and address the needs of the entire community. How are we doing? Surveys conducted of Clay County residents for this 2015 edition showed that on average it took 30 minutes to get to work. This average included those working in Clay County as well those commuting to surrounding counties. Clay County residents working within the county reported a 17 minute commute, on average, compared to 13 minutes in 2008. Clay County residents working in Duval County reported a 38 minute commute in the 2008 and 2015 surveys. Mass transit ridership and the number of available bus routes have been steadily increasing since 2008. The Clay County Transit Authority offered six flex-routes throughout the county in 2014 including routes that interconnected with transit systems in Duval, Putnam, and Alachua counties.

Demographics

In 2014, Clay County was home to 199,798 people, having grown by 42 percent since the 2000 Census Population Count. In comparison, Florida's population increased by 24 percent between 2000 and 2014. By 2030, the population of Clay County is expected to grow to 268,409 people.

Race and Ethnicity

The 2013 American Community Survey describes Clay County as follows:

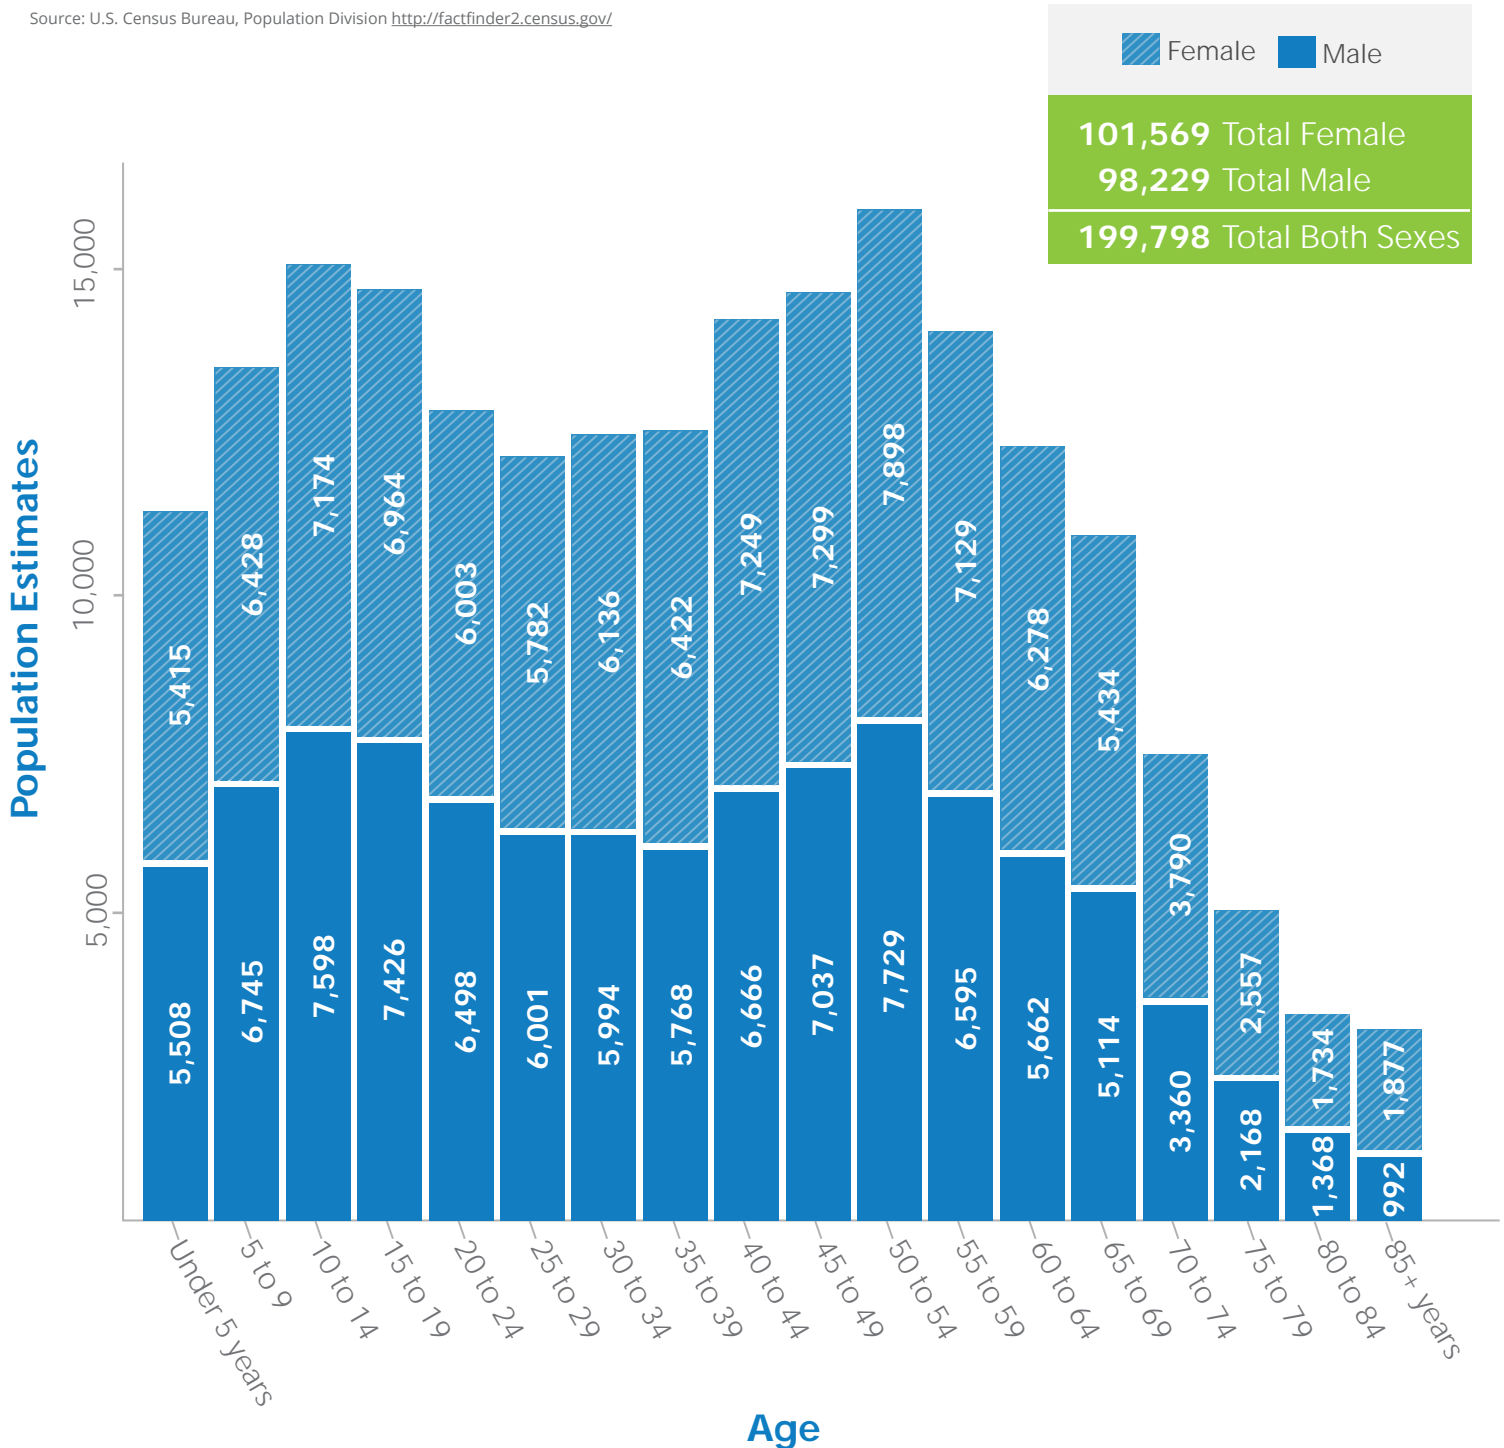

Source: U.S. Census Bureau, Population Division <http://factfinder2.census.gov/>

Population by Age and Gender

The median age in Clay County is 39.2 years. Children 19 and under account for 26.7% of the population, while residents 65 and older account for 14.2% of the population. (By comparison, the median age in Florida is 41.8 years.) Females account for 51% of the population, while males account for 49%.

Source: U.S. Census Bureau, Population Division <http://factfinder2.census.gov/>

Geography-Clay County, Florida: Annual Estimates of the Resident Population for Selected Age Groups.

Community Perceptions

In 2008 and 2015, telephone surveys were conducted in Clay County. Some of the indicators in this report come from these telephone surveys.

The surveys began with this question:

“All things considered, how satisfied are you with the quality of life in Clay County today? Would you say you are very satisfied, somewhat satisfied, not very satisfied, or not at all satisfied?”

Of those surveyed in 2015, 90% were “very” or “somewhat” satisfied with the quality of life in Clay County as compared to 92% in 2008.

Despite the economic downturn that followed the 2008 survey, resident satisfaction with the quality of life in Clay County was quite high and showed little change in the 2015 survey.

Satisfaction with Quality of Life

Arts & Culture

Vision

Clay County appreciates and supports the arts and values its cultural institutions. The arts community creates, collaborates and communicates its events and programs to provide quality artistic, accessible and diverse opportunities for Clay residents, including students of all ages. Clay residents, businesses and the education community strengthen and grow the arts by supporting the arts community.

How are we doing?

Attendance at Selected Arts Events

In 2014, attendance at local arts venues totaled more than 53,000, reflecting a strong interest in the arts in the community. The attendance figures at selected arts events were:

*Canceled due to weather

Number of Attendees

	2006	2007	2008	2009	2010	2011	2012	2013	2014

2014 - 2,500
 2015 - 4,000

Art Pieces in Rotating Exhibits

Source: Art Guild of Orange Park

Another indicator of the arts is the number of art pieces shown in rotating exhibits within Clay County. This indicator seeks to measure both the productivity of local artists as well as the opportunity for residents to view visual fine arts. The total number of pieces in rotating exhibits has nearly doubled since 2006.

Attendance at Clay County Fairgrounds

Clay County is also home to numerous cultural institutions. Attendance at these events brings the community together and maintains traditions. Attendance figures for these events were:

	2007	2008	2009	2010	2011	2012	2013	2014	2015
Clay County Fair	75,392	81,434	84,152	102,728	108,833	100,150	103,367	110,078	113,591

Students per Art Teacher

In the 2014-15 school year, 17,064 students in Clay County public elementary schools (K-6) had to share 11 art teachers and 23 music teachers. Additionally, The Art Enrichment Program of Clay County had approximately 55 volunteers in 2014-15 who shared art with students in Clay County elementary schools. The number of elementary students per paid art teacher (arrived at by dividing total students by number of teachers) was:

2006-07 - 779

Persons Employed in the Arts

The number of people working in the arts-related fields in Clay County has significantly increased from 1.2 percent of the workforce in 2003 to 3.2 percent of the workforce in 2014. In comparison, only 1.4 percent of Duval County's workforce was employed in the arts-related fields in 2014 and in St. Johns County's the arts employed represented 4.0 percent of the workforce. By year, employment figures were:

Source: U.S. Census Bureau Local Employment Dynamics (Note: The data in this indicator replaces the data from the 2008 Report as the Bureau now uses only NAICS-based statistics to report this data.) <http://lehd.did.census.gov/led/datatools/qwiapp.html>

Arts Employed (percent of workforce)

- Clay
- Duval
- St. Johns

Persons Volunteering in the Arts

Volunteers play a vital role in the arts community in Clay County. In 2014, the Thrasher Horne Center had 59 regular volunteers (serving throughout the year); Art Enrichment Program of Clay County had 55 regular volunteers; Art Guild of Orange Park had 40 regular volunteers; and Orange Park Community Theater had approximately 325 regular volunteers throughout the year.

Sources: Art Enrichment Program of Clay County, Art Guild of Orange Park, Orange Park Community Theater, and Thrasher Horne Center

Economy

Vision

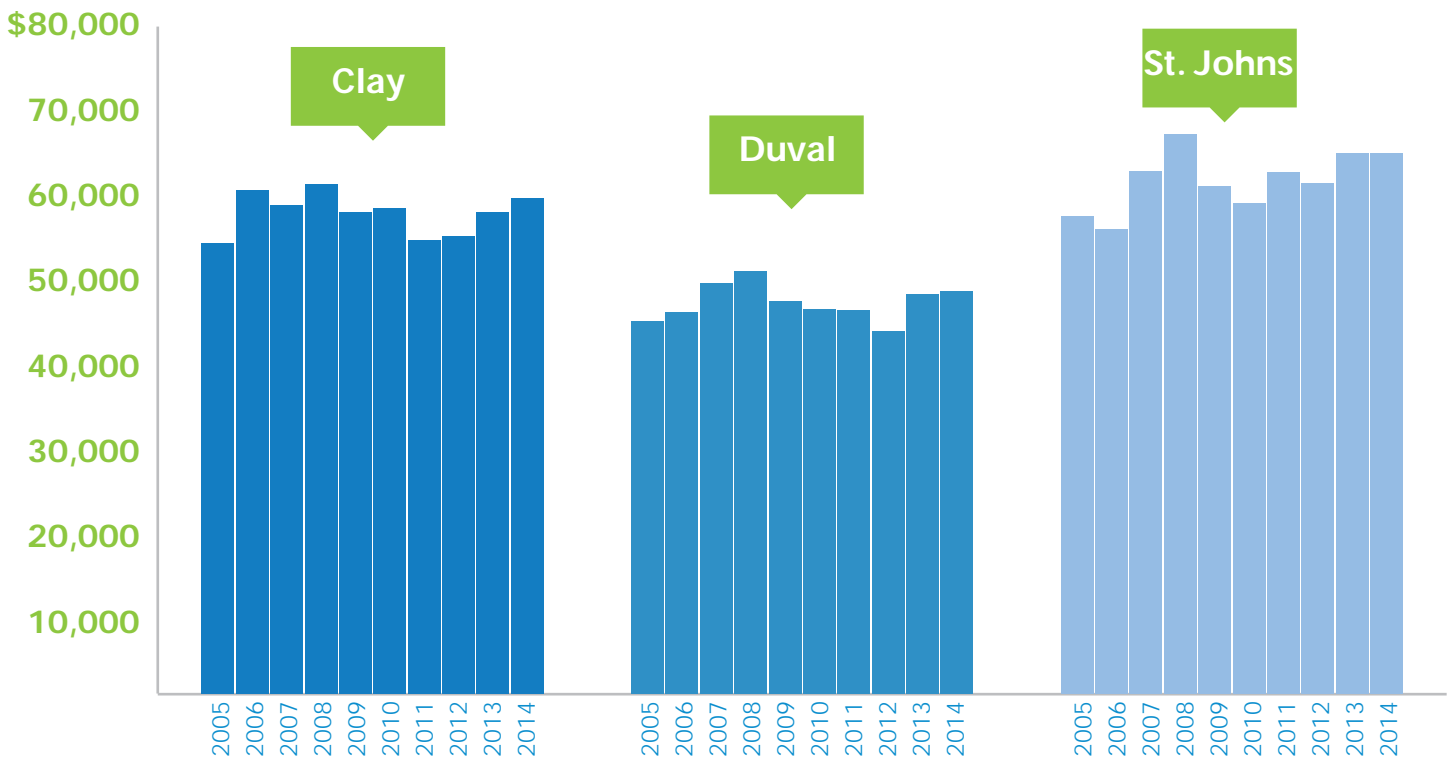

Clay County provides an environment that creates and continuously promotes diverse opportunities for productive employment at wages that allow residents to work within the county. Clay County's job opportunities attract and retain a talented and educated workforce and the county offers a variety of attainable and affordable housing.

How are we doing?

Median Household Income

The median household income in 2014 in Clay County was \$59,482, compared to median household incomes in Duval of \$48,323 and St. Johns of \$64,876.

Source: US Census Bureau, American Community Survey (Economic Characteristics)

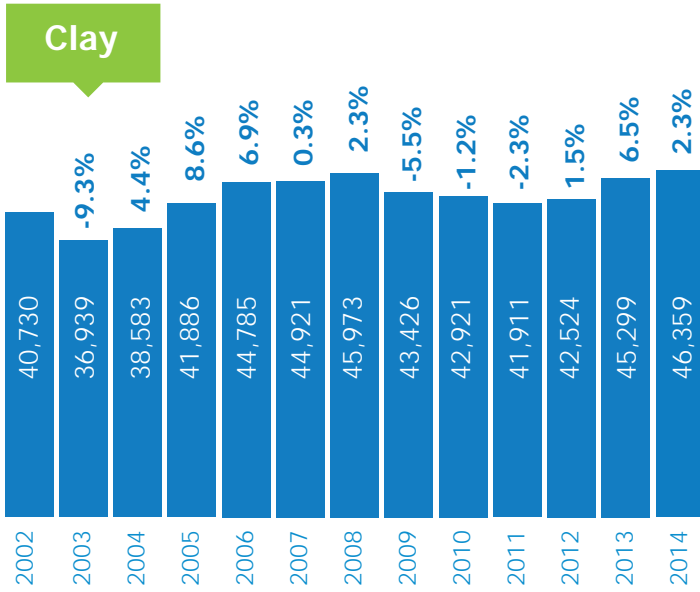

Net Employment Growth

In 2014, there were 46,359 jobs in Clay County, a 13.8 percent increase in the number of jobs since 2002. In comparison, in 2014, Duval County had 456,107 jobs, a 7.4 percent increase, and St. Johns County had 63,384 jobs, a 49.8 percent increase in the number of jobs since 2002.

Duval	\$37,027	\$38,635	\$40,095	\$42,232	\$43,641	\$43,724	\$44,006	\$45,084	\$45,543	\$47,043	\$47,489	\$48,820
Florida	\$33,544	\$35,186	\$36,800	\$38,485	\$39,746	\$40,568	\$40,970	\$41,581	\$42,310	\$43,210	\$43,645	\$44,798

Per Capita Income

Per capita personal income in Clay County has increased by 38 percent since 2000. Clay County's per capita income as a percent of the national average declined from 89 percent in 2000 to 81 percent in 2014 (meaning that nationally, per capita income rose faster than it did in Clay County).

The indicator measures the income of all residents of Clay County, regardless of their place of employment. Per capita income is not available to compare where people work, though some conclusions may be drawn by comparing annual average wages per county.

Source: US Bureau of Economic Analysis <http://www.bea.gov/regional/bearfacts/>

Unemployment Rate

In 2014, the unemployment rate in Clay County was 5.7 percent, a decrease from 6.3 percent in 2013. The rate was below the U.S. rate of 6.2 percent and Florida rate of 6.3 percent.

Financial Security

When asked, "Is your financial security today better, worse, or about the same as compared to three years ago?", 36 percent of the respondents said that their financial security was better than it was three years ago. Source: University of North Florida Public Opinion Research Laboratory

Where the Labor Force Works

When asked, "In which county do you work?", 45 percent of the workers from the 2015 survey responded they were employed in Clay County, while 41 percent worked in Duval County and the remainder were employed in other counties.

The 2010 U.S. Census Bureau American Community Survey estimated 57.2 percent worked outside Clay County vs. 60 percent in the 2000 U.S. Census.

Source: U.S. Census Bureau

Education of Work Force

In 2013, 89.5 percent of Clay County's population 25 years and over (131,769) had a high school graduate or higher degree. 22.5 percent had a bachelor's degree or higher.

Source: U.S. Census Bureau American Community Survey

Homeownership Rate

Clay County residents tend to own their own homes. The 2010 U.S. Census reported a 76.4 percent homeownership rate for Clay County compared to a 67.4 percent homeownership rate statewide for Florida and a 65.1 percent nationwide rate in 2010.

Property Tax Collections Per Person

In 2014, Clay County collected \$175.6 million in property taxes, or \$879 for each resident. This includes county taxes, school taxes, municipal taxes, as well as taxes for independent districts and special districts. (This does not include sales tax or other fees.) This represents an increase of 3.7 percent from 2013 property tax collections.

Source: Clay County Tax Collector's Office as of July 24, 2015

Education

Vision

Clay County encourages, rewards, and sets expectations for lifelong learning. Educational excellence begins at birth with a community that cultivates and encourages learning. Every student will graduate from Clay County's public schools prepared for post-secondary education and/or the global workforce.

HOW ARE WE DOING?

Percent of Fourth Graders Achieving a 4 or 5 in Reading on the FCAT 2.0

In 2011, Florida began transitioning from "the FCAT to the FCAT 2.0 to align with the Next Generation Sunshine State Standards." FCAT scores prior to 2011 are based on a different scoring scale than what is provided now with FCAT 2.0. Since 2011 when FCAT 2.0 began, the percent of fourth grade students achieving a 4 or 5 in Clay County is consistently higher than the state average. A level 4 score means the student has demonstrated "an above satisfactory level of success with the challenging content of the Next Generation Sunshine State Standards" and a level 5 score means the student has demonstrated "mastery of the most challenging content of the Next Generation Sunshine State Standards."

Florida - FCAT 2.0 Fourth Grade Reading			
Year	% Level 4	% Level 5	% Achieving 4 or 5

High School Graduation Rate

Clay County's high school graduation rate has consistently increased during the past five years, rising from 63.7 percent in 2007-08 to 80.1 percent in 2013-14. Florida calculates graduation rates in accordance with U.S. Department of Education regulations. These rate regulations include standard diplomas only and not special diplomas or GEDs.

Clay Graduation Rate		Florida Graduation Rate	
2013-14	80.1%	2013-14	76.1%
2012-13	77.9%	2012-13	75.6%

2009-10	70.0%	2009-10	69.0%
2008-09	67.0%	2008-09	65.5%
2007-08	63.7%	2007-08	62.7%

<http://www.fldoe.org/eias/eiaspubs/pubstudent.asp>

Average ACT and SAT Scores

The data shows a meaningful increase in the number of Clay County students taking exams. Since 2005, the number of Clay County students taking the ACT has doubled and the number of students taking the SAT has increased by 18 percent. This indicates more students are prepared for higher level educational opportunities.

Average Scores	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13

Advanced Placement Exams

The number of Clay County high school students taking Advanced Placement (AP) exams has grown significantly. In the 2014-15 school year, Clay County public schools administered 3,539 AP exams. This represents an increase of 74 percent since the 2006-07 school year. In addition, the number of passing scores has risen as well. In 2006-07, 46 percent of test takers received a passing score and in 2014-15 the number jumped to 59 percent.

School Year	Exams Administered	Receiving Passing Score
2014-15	3,539	2,083
2013-14	3,522	1,849
2012-13	3,369	1,856

Number of Students Participating in Dual Enrollment

In the 2014-15 school year, 1,135 Clay County public school students participated in the dual enrollment program (enrolled in some college courses while still in high school). This represents an increase of 29 percent since the 2013-14 school year.

Source: Clay County School District

Volunteerism in Clay County Public Schools

In the 2014-15 school year, 1,734 people gave of their time by volunteering a total of 162,491 hours (an average of 93 hours per volunteer) in Clay County public schools. Clay County citizens have continually demonstrated a high commitment to volunteering with our students.

Source: Clay County School District

Educational Expenditure Per Student

In the 2014-2015 school year, Clay County spent \$7,967 per student enrolled in a Clay County public school. In comparison with Duval and St. Johns counties, in the 2013-14 school year, Clay County spent \$7,840 per student enrolled in a Clay County public school, Duval County spent \$8,566 per student enrolled in a Duval County public school, and St. Johns County spent \$8,117 per student enrolled in a St. Johns County public school. Expenditures used for these calculations include all those necessary to operate the school district (e.g. transportation, food services, personnel, etc.)

Source: Clay County School District and Florida Department of Education (Financial Profiles of Florida School Districts)

Health

Vision

All Clay County residents have access to comprehensive, quality, and affordable health care.

How are we doing?

Medicaid Enrollment

Medicaid is a joint state and federal program that provides some health coverage for lower income residents, as well as assistance to seniors and disabled residents. Enrollment is based on income and assets. Both Florida and Clay have seen a steady increase in the percentage of the population enrolled in Medicaid but Clay County's rate remains lower than the statewide rate.

Emergency Room Visits

Between 2012 and 2014, the number of visits to emergency rooms in Clay County increased by 36 percent and emergency room admissions in Clay County increased by 23 percent. In relation to population growth, Clay County's population grew by 3 percent between 2012 and 2014. This reflects the rising trend in emergency room visits and the addition of the new emergency room centers with the ability to serve Clay County residents and residents of surrounding counties.

An additional resource for the Health Section is Northeast Florida Counts at www.neflcounts.org. This online resource has more than 175 health related quality of life indicators posted for all seven northeast Florida counties including Clay County.

Public Safety

Vision

Clay County public safety officials strive to make residents and visitors feel safe and secure while at home, work, or school. Citizens experience a low level of crime and enjoy highly regarded fire/rescue, law enforcement, and emergency management operations.

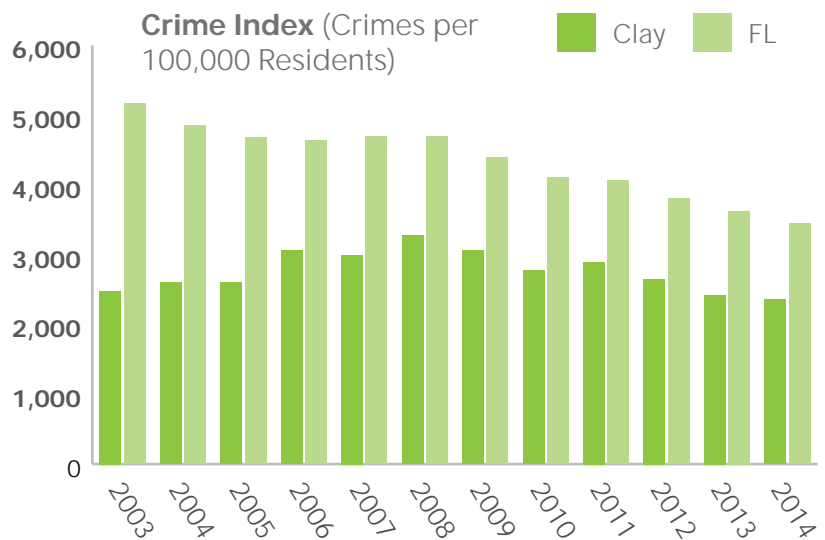

Comprehensive public safety services support and enhance our outstanding quality of life. Public safety providers leverage services by capitalizing on strong relationships with the faith-based community, non-profit organizations, and the private business sector as well as other governmental entities. These relationships add substantive value and act as a force multiplier to public safety providers in their endeavor to provide residents and visitors with a safe and secure community to enjoy.

How are we doing?

Crime Rate

The Total Index Crime Rate per 100,000 residents in Clay County decreased by 2.8 percent from 2013 to 2014 and was 32 percent lower than the Total Index Crime Rate per 100,000 residents in Florida in 2014.

<http://www.fdle.state.fl.us/Content/getdoc/a324add7-5dd6-4201-9696-93bfd76bc36c/UCR-Home.aspx>

Number of Arrests

The number of adult arrests reached a high in 2008 and then began to decline. From 2013 to 2014 the number of adult arrests decreased by 14 percent and was the lowest number in the previous 11 years. The number of juvenile arrests reached its high in 2007 and then began to decline. In 2014, the number of juvenile arrests also reached its lowest number in the previous 11 years, a 36 percent decrease from 2003.

Source: Florida Department of Law Enforcement – Uniform Crime Reports
<http://www.fdle.state.fl.us/Content/getdoc/a324add7-5dd6-4201-9696-93bfd76bc36c/UCR-Home.aspx>

Percentage of Crimes Cleared

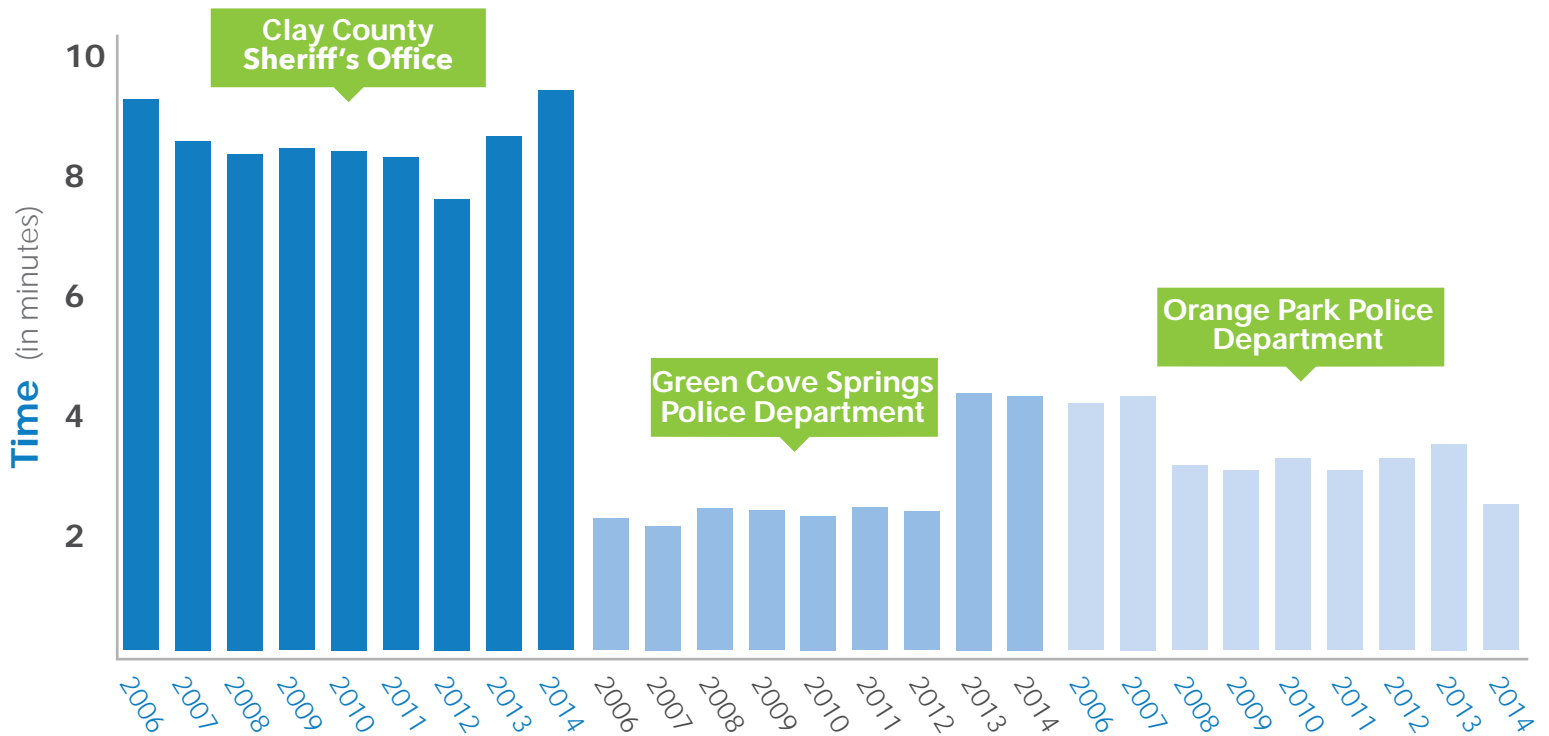

Crimes are reported as cleared by law enforcement in two ways. “Cleared by Arrest” means that the offender is arrested, charged, and turned over to the court for prosecution. “Cleared by Exception” means that the identity of the offender is established; enough information exists to support the arrest, charge, and prosecution of the offender; and the offender’s whereabouts are known, yet some reason beyond law enforcement control stops law enforcement from arresting, charging, and prosecuting the offender.

Source: Florida Department of Law Enforcement – Uniform Crime Reports
<http://www.fdle.state.fl.us/Content/getdoc/a324add7-5dd6-4201-9696-93bfd76bc36c/UCR-Home.aspx>

Average Law Enforcement Response Times

Law enforcement response times are dependent, in part, on the geographical area covered. Clay County has three law enforcement agencies: the Clay County Sheriff's Office provides coverage countywide (643 square miles); the Green Cove Springs Police Department covers 12.4 square miles; and the Orange Park Police Department covers 5.6 square miles.

Total number of police calls:

	2006	2007	2008	2009	2010	2011	2012	2013	2014
Clay County Sheriff's Office	314,259	349,294	370,594	333,507	330,878	296,585	281,831	324,413	335,518
Green Cove Springs Police Department	28,023	28,830	29,917	28,477	27,916	31,521	31,094	29,742	39,957
Orange Park Police Department	18,128	17,128	18,798	27,273	30,897	32,874	39,702	33,671	36,470

Sources: Clay County Sheriff's Office, Green Cove Springs Police Department, and Orange Park Police Department

Agency Notes: In 2008, the Clay County Sheriff's Office enacted changes to the take-home car policy that caused a decrease in the number of self-initiated calls for service (those proactively generated by the deputies versus actual calls from Clay County citizens). The dramatic increase beginning in 2009 to the number of Orange Park Police Department service calls is attributed to changes in their protocol for assigning case numbers and managing information.

Average Fire and Rescue Response Times

Average emergency response times for Clay County Fire and Rescue improved slightly in 2014 by 4 seconds while the total number of calls increased.

	Total Response Time	Total Calls	Total Non Emergency	Total Fire	Total EMS	Total Fire/ EMS
2008	7:11	16,530	1,978	3,064	11,488	14,552

Non-Commercial Boat Registrations and Boat Ramps

Clay County had 11,614 non-commercial vessel registrations (pleasure boats) in 2014, nearly half of which (6,013) were Class 1 vessels, (16' - 25'11").

In 2014, Clay County had 18 public and private boat ramps (some with multiple lanes), or one boat ramp for every 645 boats registered in the county. In addition, Clay County had 165 commercial vessel registrations in 2014, up from 143 in 2013.

Boat Registrations

Organized Sports Participants

This indicator examines participation in organized sports in Clay County. In 2014, 3,411 youth participated in an organized sports program with the YMCA, 546 youth were served by the Police Activities League (PAL), and 2,000 youth played soccer with the Clay County Soccer Club. Children and teens in Clay County also have an opportunity to participate in organized sports via athletic associations that offer competitive play in football, baseball, soccer, cheerleading, and lacrosse. Similar opportunities also exist for students in middle and high schools.

In 2014, Clay County had 33 baseball fields, 13 basketball courts, 9 football/multi-purpose fields, 31 soccer fields, 26 tennis courts, and 11 softball fields. These numbers do not include private recreation areas. More than 9,500 adults and children participated in an organized sports program at one of the many parks throughout Clay County managed by the Clay County Division of Parks and Recreation.

Environment

Vision

Clay County's abundant natural resources are effectively managed and carefully preserved and protected. Clay County manages its growth in a sustainable fashion without compromising the natural environment and conserves and protects its water resources.

How are we doing?

Reclaimed Water

Reclaimed water is wastewater which has been thoroughly treated to remove harmful organisms and substances so it can be reused. Reclaimed water is commonly used to irrigate golf courses, residential landscapes, corporate grounds, agricultural fields, and sports fields. It can also be used for industrial heating and cooling, for car washes, and to replenish wetlands during times of drought.

Water Conservation

The general consensus among water management districts and utilities is that the best measure for water conservation is the residential daily per capita water use. While other factors can vary widely, indoor water usage remains somewhat constant with the biggest factor being the age of the house or the plumbing fixtures and appliances.

Total Maximum Daily Load (TMDL) for Nitrogen and Phosphorous

The health of the Lower St. Johns River is a vital quality of life indicator for the residents of Clay County. Nutrient pollution has caused significant algal blooms over the years, prompting the Florida Department of Environmental Protection (FDEP) to establish a Total Maximum Daily Load (TMDL) for nitrogen and phosphorous in the River. The TMDL establishes the maximum annual loading of nutrients from discharges and runoff into the River and also requires the various stakeholders to reduce their current loading. Stakeholders along the Lower St. Johns River have developed a Basin Management Action Plan (BMAP) that tracks the progress toward achieving the TMDL. The following charts illustrate the load reductions made in Total Phosphorous (TP) and Total Nitrogen (TN) in achieving the TMDL goals. By 2013, reductions (allocation goals) were 95% complete for phosphorous and 94% complete for nitrogen. Source: Florida Department of Environmental Protection <http://www.lsjr.org/documents.html#BMAP>

Governance

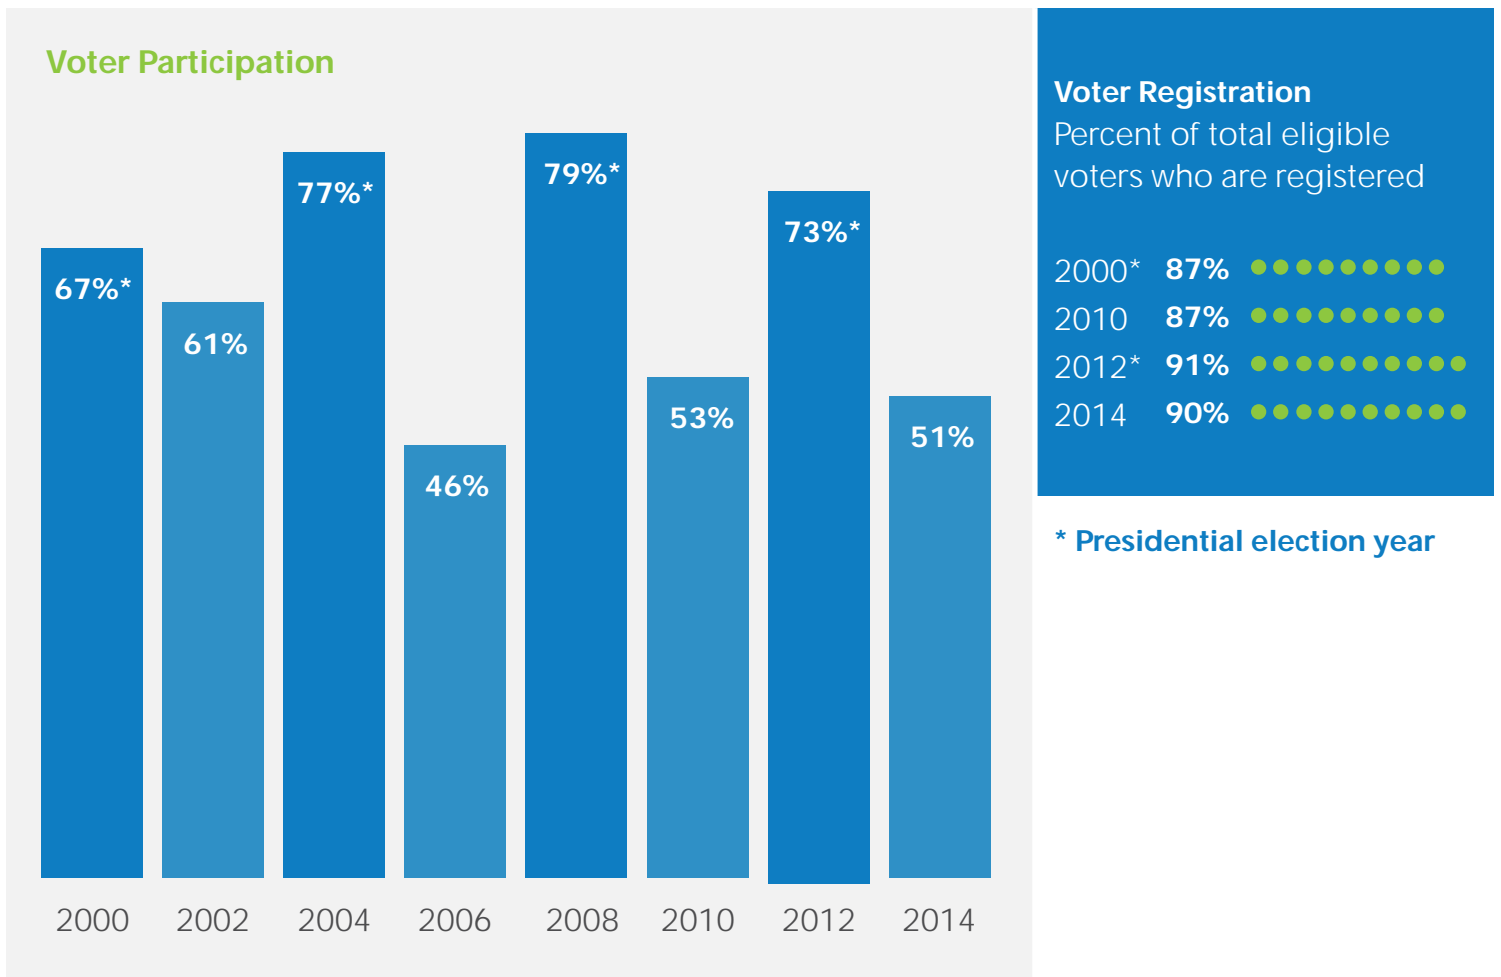

Vision

Local government is pro-active and responsive to the needs and concerns of the people they serve. They encourage and value citizen involvement. Local government ensures the trust and confidence of its citizens through ethical, transparent, and accountable behavior.

HOW ARE WE DOING?

Voter Participation

The percentage of adults (18 and over) registered to vote stayed constant at 87% from the 2000 U.S. Census to the 2010 U.S. Census. By 2014 voter registration had increased to 90%. Voter turnout has been higher in presidential election years than in statewide elections.

Source: Clay County Supervisor of Elections

Cost of County Government per Resident

One measure of government accountability is the cost of government. This indicator measures the total Clay County Board of County Commissioner’s annual budget, divided by the population of Clay County. This is not the same thing as property taxes collected per resident, which can be found in the Economy section; property taxes only make up approximately one-fourth of county government revenue.

Clay County Budget

(Total Actual Appropriated Expenditures and Ending Balance)

2005-06	\$232.6 million
2006-07	\$276.1 million
2007-08	\$270.0 million

 Note: Fiscal year 2008-09 included \$84 million in debt financing for road construction projects, which also impacted later years as the funds carried forward to completion.

Opinion of the Quality of Leadership in Government

Survey question: "In your opinion, is the quality of leadership in our local Clay County government excellent, good, fair, or poor?"

Only 4% of the 2015 respondents rated the quality of leadership in Clay County government as "excellent," and 37% thought it was "good." The respondents were less positive in the quality of county leadership in 2015 than in 2008, when 49% of respondents rated the quality of leadership as excellent or good. Social Well-Being

Vision

Clay County residents see themselves as part of a compassionate community they have helped to create. All residents, regardless of age, race, faith, or socio-economic background, have the opportunity to live a satisfying life where all basic needs are fulfilled. Citizens and public and private institutions sustain a family-friendly environment with a small community atmosphere through community partnerships and connectedness.

HOW ARE WE DOING?

The following measures look at people served by a sample of some of the many church outreach programs in Clay County in order to gauge both trends in residents struggling to meet basic needs and the compassionate responses of the community. The churches below are an example of the many social service organizations and institutions that serve Clay County residents.

People Served by Church Outreach

Number of People Receiving Services (food, clothing, household items, etc.)	2008	2009	2010	2011	2012	2013	2014
Orange Park United Methodist Church	3,104	4,760	4,655	23,600	24,800	25,100	18,450

People Served with Hot Meals

Clay County Council on Aging provides hot meals for seniors at its four senior centers Monday through Friday and also provides homebound seniors with meals through its Meals on Wheels program. The Clay County Soup Kitchens, which was established in October 2009, provides hot meals for the underserved every Saturday at its three locations throughout Clay County (Orange Park, Green Cove Springs, and Middleburg).

Clay County Council on Aging meals provided to seniors (includes Meals on Wheels program)	
2008	40,791
2009	53,383
2010	47,373
2011	41,393
2012	36,272
2013	45,999
2014	52,558

Clay County Soup Kitchens meals provided	
2009 (established October 2009)	608
2010	5,333
2011	10,131
2012	9,637
2013	8,478
2014	9,910

Recipients of Public Assistance

Another measure of both people trying to meet basic needs and the community's response is participation in the Food Stamps and Temporary Assistance to Needy Families (TANF) government assistance programs. While both programs are based on need, TANF assistance is time-limited.

Transportation

Vision

Clay County seeks to provide an efficient transportation system which safely, conveniently, and effectively serves the mobility needs of all residents, visitors, and businesses. It offers a variety of transportation modes and the requisite transportation infrastructure to support a growing population and employment base. Transportation solutions are coordinated to benefit Clay County residents and businesses.

How are we doing?

Survey: How Long Is Your Commute?

Survey question: "On average, how many minutes does it take you to go from your home to where you work?"

Of those surveyed in 2015 in Clay County, on average they responded it took 30 minutes to get to work. 25% had a commute of at least 45 minutes. These statistics include those who were employed within Clay County.

Clay County remains a county where a significant percentage of the working residents commute to Duval County for employment.

Average Commute

	2008 Commute	2015 Commute
Work in Clay County	13 minutes	17 minutes
Work in Duval County	38 minutes	38 minutes
Work Elsewhere	40 minutes	47 minutes
Average	24 minutes	30 minutes

Source: Ulrich Research Services, Inc. and University of North Florida Public Opinion Research Laboratory

Mean Travel Times to Work

In the 2000 U.S. Census, the mean travel time to work for residents of Clay County (regardless of county of employment) was 33.5 minutes. In 2005, when the data began to become available through the American Community Survey, mean travel time had decreased to 32.9 minutes. In 2013, the mean travel time had decreased to 31.6 minutes. At the time of this publication, mean travel times statistics for 2014 were not yet available.

Source: U.S. Census Bureau, American Community Survey

2005	32.9 minutes
2006	33.4 minutes
2007	33.3 minutes
2008	31.0 minutes
2009	32.2 minutes
2010	31.0 minutes
2011	31.5 minutes
2012	31.9 minutes
2013	31.6 minutes

Daily Vehicle Miles Traveled

Daily vehicle miles traveled is a product of the annual average daily traffic count and the length of the roads. Fewer miles traveled results in tangible cost savings for those commuting to work. The monetary savings include the cost of gasoline and expenses associated with wear and tear on the traveler's automobile. The total miles traveled is also an indicator of economic activity as well as wear and tear on our highways, suggesting that the more miles traveled equates to increased replacement or maintenance costs for our highway system. In 2014, Clay County had 1,208 miles of paved roads and 687 miles of unpaved roads, for a total road system of 1,895 miles.

Daily Miles by Road Type

	2006	2007	2008	2009	2010	2011	2012	2013	2014

Mass Transit Ridership and Bus Routes Available

The Council on Aging (Clay Transit) has expanded the flex routes available in Clay County. The CC-53 is now referred to as the Red Line and the CC-51 is the Green Line. The Red Line travels between Middleburg and the Orange Park Mall, while the Green Line travels between Green Cove Springs and the Orange Park Mall. Additional lines have been added to include the Blue Line which travels from Green Cove Springs to NAS JAX in Duval County. The Purple Line travels from Middleburg to the Bear Run area and the Orange Line services the loop in Orange Park (Kingsley - Park - Wells Road - Blanding). Also the Magenta Line was added from Keystone Heights to Gainesville and this year the Teal Line was added from Keystone Heights to Middleburg, Lake Asbury and Orange Park. Currently all major Clay County corridors and multiple neighborhoods are served by Clay County Routes. The Clay County Transit System interconnects with the Jacksonville Transit Authority (Duval County) to the north, the Ride Solution (Putnam County) to the south east and the Regional Transit System (Alachua County).

These routes provided by Clay Transit are open to the public for a fare of \$1.00 per trip. Some buses will deviate from their route a distance of up to ¾ mile to pick up those that cannot get to the bus stop. There is an additional cost of \$1.00 when the bus deviates from the route. Monthly bus passes are available at reduced rates.

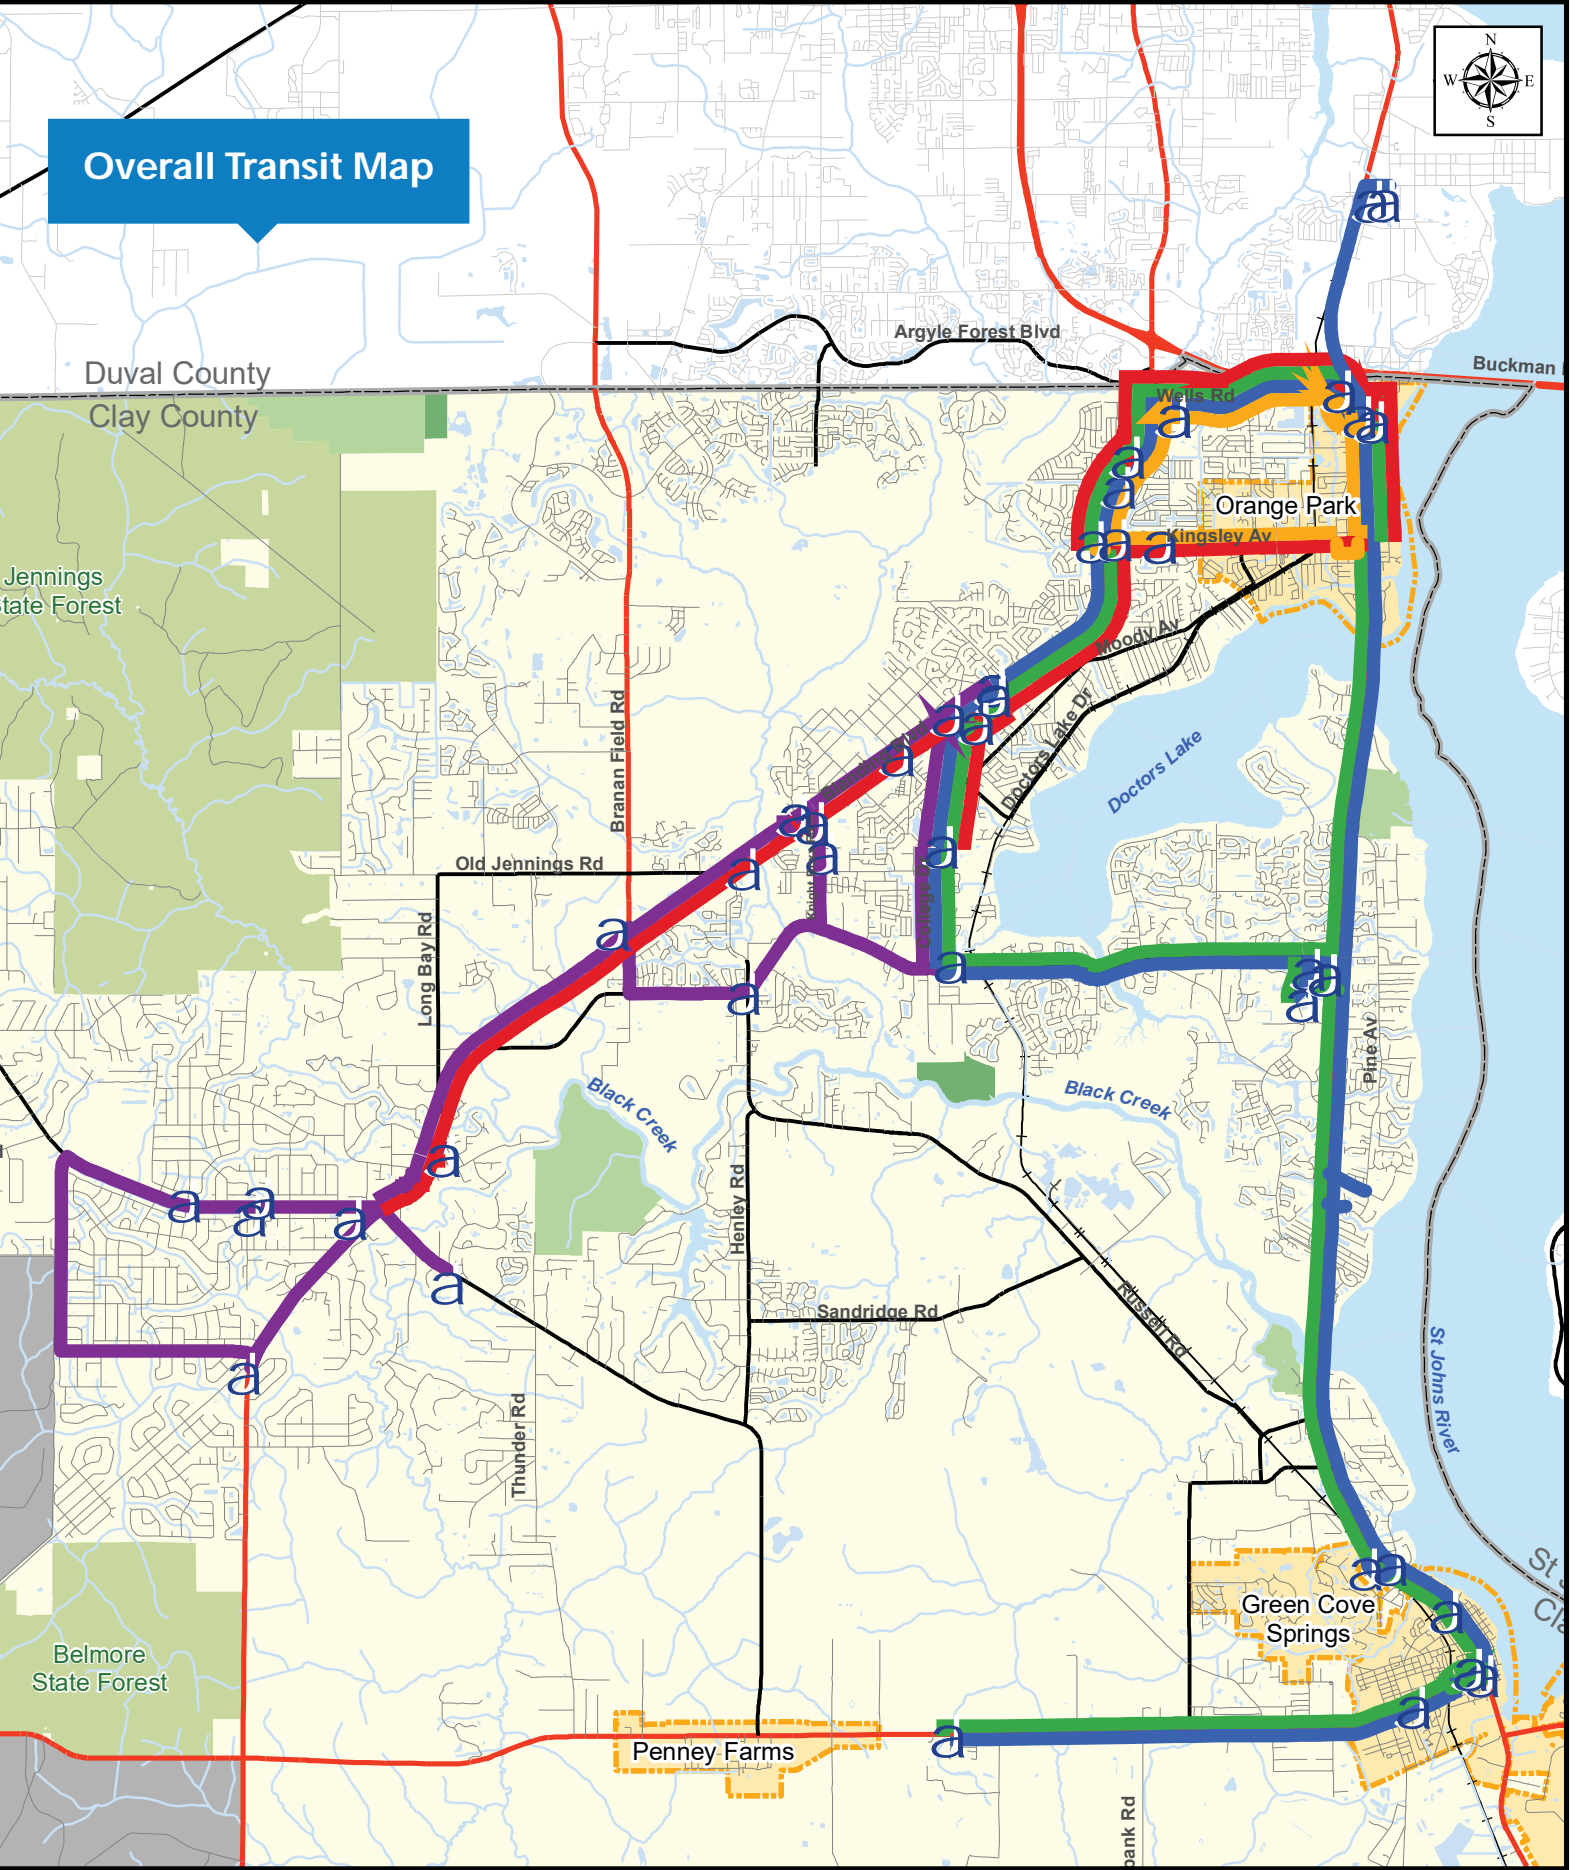

Clay Transit Annual Ridership

	2007	2008	2009	2010	2011	2012	2013	2014
